

FAST CHARGE[®] PRESENTATION

Since setting the record for the Quickest Electric Motorcycle in the UK in 2011, the designer has been on a quest to break the World Record...

Some years later the quest continues, against a background of highs and lows, and in this talk you'll hear the story behind the challenges – technical, financial, and emotional

Phil Edwards, Fast Charge[®] Project Director, will visit your school, club, or society to deliver an inspiring talk about his personal challenge to set a World Record, including the what, how, and why behind it. A demonstration of how every aspect of STEM is being harnessed in this Great British engineering project, and a highly motivating insight into the willpower and perseverance needed to keep going against many odds.

Talks can be tailored to suit specific interests and age groups, and run from 30 to 90 minutes plus time for questions. Signed copies of Phil's book – The Fast Charge[®] Story Volume 1 (2012-2015) - are available from Phil.

Note - the fee includes a donation to Canine Partners (www.caninepartners.org.uk).

About Weald Technology

Weald Technology Ltd is a social enterprise and an award-winning engineering company. Our mission is to inspire young people to pursue engineering careers, which we do with STEM workshops based on innovations in sustainable transport. We keep our knowledge up-to-date, and our STEM projects relevant, through collaborating on industrial research and development.
